

A Simple L^AT_EX Test Document

John Doe

April 10, 2026

Abstract

This document is a simple test file for verifying that a L^AT_EX environment is correctly installed and functioning. It demonstrates basic structures commonly used in academic writing.

1 Introduction

L^AT_EX is a typesetting system widely used for scientific and technical documents. It is especially popular in mathematics, computer science, and engineering due to its powerful handling of formulas and references.

2 Mathematical Example

An example of an inline equation is $E = mc^2$. A displayed equation is shown below:

$$\int_0^\infty e^{-x^2} dx = \frac{\sqrt{\pi}}{2}. \quad (1)$$

Equation 1 is a well-known result in mathematics.

3 Lists

An example of an itemized list:

- First item
- Second item
- Third item

An example of an enumerated list:

1. Step one
2. Step two
3. Step three

4 Table

Table 1 shows a simple table.

Method	Accuracy	Time (s)
Method A	0.85	1.2
Method B	0.89	1.8
Method C	0.83	0.9

Table 1: An example table for testing purposes

5 Conclusion

This test document confirms that text, mathematics, lists, tables, and references can be compiled successfully. It can be extended as a starting point for more complex academic documents.
